Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claims 2,4-13, 15-19 and 21 are pending.

Response to Arguments

The Applicants arguments filed on December 28,2006 have been fully considered.

Amended claim 21 is rejected under 35 U.S.C. 103(a) as being anticipated by Meyer et al. (US Patent 6,810,389) in view of Boebert et al. (US Patent 5,502,766)

See following rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 21 is rejected under 35 U.S.C. 103(a) as being anticipated by Meyer et al. (US Patent 6,810,389) in view of Boebert et al. (US Patent 5,502,766)

As per claim 21,

Meyer et al ('389) discloses a multi-processor system ,
comprising a plurality of processor means for managing distribution of digital content wherein a first electronic rights provider is configured to create and transmit an electronic master license wherein said master license grants to create at least one child license for a set of digital content associated with said master license within a set of parameters defined by said master license,(Column 7, lines 40-61)

wherein said second electronic rights provider is configured to

- grant said child license to an electronic media device; (Column 7, lines 40-61)

Meyer et al ('389) does not explicitly disclose an to a second electronic rights provider: Boebert et al ('766) discloses a second electronic rights provider; (Figure 3,) it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the Meyer et al ('389) method with Boebert et al ('766) method in order to provide an additional layer of security

Official Notice is taken that "process a charge associated with said child license using a set of account data associated with said media device; and transmit a set of settlement data associated with said charge to said first rights provider. " is common and well known in prior art in reference to network protocols. It would have been obvious to one having ordinary skill in the art at the time the invention was made to a specific charge and means for collecting the charge

associated with a license in order to recoup the cost of software development. The Examiner notes that this feature is commonly used by many software packages such as Microsoft Windows.

The term "configured to grant..., process... transmit ..." are a non-functional descriptive terms. The terms could be replaced with other terms. i.e. "configured to record data", etc and not change the limitations of the claim. PTO's guidelines for examining claimed language require: the examiner must make a determination, whether the claimed invention "as a whole" would have been obvious at the time of invention to one of ordinary skill in the art. See MPEP 2142. In the pending claim, the examiner submits that particular language does not serve as a limitation on the claim. In other words **language that is not functionally interrelated with useful acts, structure, or properties of the claimed invention will not serve as a limitation.** See in re Gulak, 217 USPQ 401 (CAFC 1983), *ex parte Carver*, 227 USPQ 465 (BdPatApp& Int 1985) and in re Lowry, 32 USPQ2d 1031 (CAFC 1994) where language provided certain limitations because of specific relationships required by the claims

Allowable Subject Matter

Claims 2,4-13, 15-19 are allowable over the prior art record.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
